AQUA-DYNE NEWS

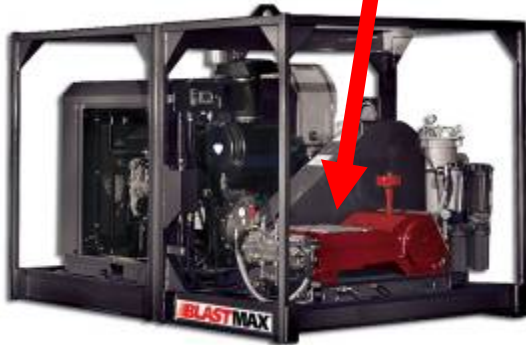

Water Blasting • Industrial Cleaning

January 2009

- ✓ The unique Valve-In-Line fluid end design provides higher volumetric efficiency for increased productivity or lower operating costs.
- ✓ The superior design of the **BLASTMAX™** fluid end delivers a 10-15% increase in productivity.

Fluid End

FEATURED PRODUCT

BLASTMAX™

BLASTMAX™ is Our Most Popular and Versatile Pumping Unit for Industrial Cleaning, Surface Preparation and Petro-Chemical!

BLASTMAX™ UNIT BENEFITS:

- ✓ Crankshaft - Aircraft quality alloy steel induction hardened journals, may extend from either side.
- ✓ Crankshaft Bearings - Heavy duty high speed journal bearings (non-Babbitt).
- ✓ Lubrication - Power ends parts are splash oil lubricated.
- ✓ Cooling and filtering oil circulation system optional for higher horsepower's.
- ✓ Connecting Rods - High strength, ribbed section, Ductile iron.
- ✓ Valves and Seats - Proprietarily treated stainless steel enhances the valve-in-line life and eliminates breakage. All valves may be reconditioned by field lapping or surface grinding.
- ✓ Plungers - Non-scoring solid Alumina Ceramic for up to 20,000 psi. Solid carbide or ceramic for up to 40,000 psi.
- ✓ Packing - Self-adjusting advanced polymer material for up to 20,000 psi. New low load design for up to 40,000 psi.

BLASTMAX™ STANDARD UNITS are available
@ 30,000-40,000 UHP (Ultra High Pressure) and
@ 3,000-20,000 LMP (Low to Medium Pressure)
